Henning Kongstad (CEO), Daniit A/S

Years of passion and experience, is what we are ALL about!

Daniit is a medium-size automation technology company, developing and implementing advanced automation solutions within control, regulation, monitoring and data collection. Our four main business areas are:

- Feed
- Aqua
- Asphalt
- Concrete

In this context, we know what building, running and maintaining a process plant means, and takes – typically involving a large number of functions that interact with each other. Misidentification and/or incorrect deliveries cause delays in any step of the manufacturing process and increases costs for everyone.

This is also why our greatest asset is our structured way of driving both small as well as large-scale electrical engineering projects ranging from Greenfield to Retrofit, as well as simple operational adjustments. Daniit is able to handle your entire project from planning, through design and production, to installation, commissioning and service of the finished system, among other things entailing:

- Quick and flexible project flow – effective project implementation hinges on thoroughly tested and well-structured phase plans
- Comprehensive knowledge and project management of all products and services
- Optimization of hardware and software in terms of functionality and the overall solution
- Specialist knowledge of all solution components – partial solutions from multiple suppliers may result in critical omissions
- Products form the basis of the solution

Product solutions range from the simple and small to complex control concepts including sophisticated software solutions, PC and PLC system networks. Our product and application knowledge ensures that competitive solutions are developed based on customer-specific needs. To this end, quality is central to everything we do. We have a systematic approach to quality, meaning that our processes are ISO 9001:2008 compliant.

With our solid industry experience, deep technical know-how and detailed understanding of complex manufacturing processes, we are able to understand and solve your specific challenges, and thereby help to develop and implement innovative and reliable automation technology solutions.

The GoZee app makes the brochure come alive

Explore the brochure with the GoZee app on your smartphone or tablet and find photo galleries, direct web access, 360° panoramas and snap videos via augmented reality

GoZee: Get started in 30 seconds

1. Go to App Store or Google Play, enter “GoZee” in the search field and download the app to your smartphone or tablet.
2. Open the app and use it on pages with the GoZee icon.

Our value proposition

FEED

Designing, manufacturing and delivery of control systems (FCS) and MCC's/OCC's for animal and aqua feed as well as pet food with emphasis on data collection, traceability, MES and quality (Quality & Density Tester) documentation.

AQUA

Designing, manufacturing and delivery of control and Water Treatment systems (WTC) and MCC's/OCC's with emphasis on data collection, traceability, MES and quality documentation.

ASPHALT

Designing, manufacturing and delivery of control systems (ACS) and MCC's/OCC's with emphasis on data collection, traceability and quality documentation.

CONCRETE

Designing and manufacturing of all MCC's for concrete plants worldwide in a partnership based upon a total (outsourced) solution.

AFTER SALES

Delivery of all the aspects of electrical after sales services within the areas of service level agreements (SLA), management consultancy, field services, component kits and much more.

Let's automate and grow your business

Mission

To be a customer centric,
performance- and technology-
driven project company within
automation technology.

Vision

To deliver differentiated, innovative
and reliable automation technology
solutions for domestic as well as
foreign niche markets.
